

CANDAL Hacker v3 — High-Signal, Low-Martingale Exploit Report

Generated: 2026-09-29 00:42:32 Assets analyzed: 16 Total exploits found: 3630

Methodology

Each exploit predicts the color of the NEXT 1-minute candle. **Martingale is RARE**: it's only used when Level 1 loses. We track `martingale_frequency` = % of trades that needed martingale.

- Target L1 win rate: $\geq 65\%$ (without martingale)
 - Target Martingale win rate: $\geq 85\%$ (safety net)
 - Min signals: 25
 - Statistical significance: $p < 0.01$
-

 Expected Daily Signals

- Top 50 exploits: **221.3 signals/day**
 - Top 30: **151.5 signals/day**
 - Top 20: **104.2 signals/day**
 - Top 10: **51.8 signals/day**
-

Top 50 Exploits (sorted by L1 win rate, low martingale frequency, signal volume)

Mart Freq = % of trades that needed martingale (lower is better — martingale used rarely)

🌟 Best 'No-Martingale-Needed' Exploits (L1 ≥ 70%)

These are exploits where Level 1 wins so often that martingale is almost never needed.
