

CANDAL Trader Playbook — Top 25 Binary Exploits

Generated: from 1078 total exploits **Filtered to:** martingale win rate $\geq 85\%$ with statistical significance ($p < 0.05$)
Top picks: 25 highest-confidence exploits

How to Use This Playbook

Each exploit is a **rule** for entering a binary option trade.

The rule is: 1. Wait until ALL the listed conditions are TRUE at the close of the current 1-minute candle. 2. Enter the trade in the listed DIRECTION (CALL if BULL, PUT if BEAR). 3. Trade duration: **1 minute** (the very next candle). 4. If the first trade **LOSES**, enter the same direction on the very next bar (Martingale, **only once**). 5. If the second trade also loses, **stop** — do not continue martingale.

Note on time-window exploits: the entry only fires at the specific UTC hour listed. **Note on London KZ exploits:** the entry only fires between 07:00-09:59 UTC.

Top 25 Exploits — Sorted by Martingale Win Rate

#1 USDMXN_otc — PUT (SELL) (97.3% Martingale)

Type: `Triple+LondonKZ` **Conditions:** RSI(14) > 70 (overbought) + Three consecutive green candles before this bar + ATR below its 50-bar average (low volatility) **Performance:** - Signals in 30 days: **37** - Level 1 win rate (no martingale): **73.0%** - Martingale win rate (with 1 retry): **97.3%** - Statistical p-value: **0.0009** (✓ significant)

#2 USDIR_otc — CALL (BUY) (94.6% Martingale)

Type: `Triple+LondonKZ` **Conditions:** Close below Bollinger Lower Band + Three consecutive red candles before this bar + ATR below its 50-bar average (low volatility) **Performance:** - Signals in 30 days: **37** - Level 1 win rate (no martingale): **81.1%** - Martingale win rate (with 1 retry): **94.6%** - Statistical p-value: **0.0030** (✓ significant)

#3 BRLUSD_otc — PUT (SELL) (93.8% Martingale)

Type: `TimeWindow` **Conditions:** At 18:00 UTC, when: Shooting star **Performance:** - Signals in 30 days: **48** - Level 1 win rate (no martingale): **58.3%** - Martingale win rate (with 1 retry): **93.8%** - Statistical p-value: **0.0013** (✓ significant)

#4 USDMXN_otc — PUT (SELL) (93.3% Martingale)

Type: `Triple+LondonKZ` **Conditions:** RSI(14) > 70 (overbought) + Two consecutive green candles before this bar + ATR below its 50-bar average (low volatility) **Performance:** - Signals in 30 days: **60** - Level 1 win rate (no martingale): **65.0%** - Martingale win rate (with 1 retry): **93.3%** - Statistical p-value: **0.0005** (✓ significant)

#5 USDZAR_otc — CALL (BUY) (93.3% Martingale)

Type: `TripleCombo` **Conditions:** RSI(14) < 30 (oversold) + Hammer candle (long lower wick, small body) + Two consecutive red candles before this bar **Performance:** - Signals in 30 days: **30** - Level 1 win rate (no martingale): **63.3%** - Martingale win rate (with 1 retry): **93.3%** - Statistical p-value: **0.0102** (~ marginal)

#6 USDPKR_otc — PUT (SELL) (92.2% Martingale)

Type: `TimeWindow` **Conditions:** At 13:00 UTC, when: Close above Bollinger Upper Band **Performance:** - Signals in 30 days: **64** - Level 1 win rate (no martingale): **67.2%** - Martingale win rate (with 1 retry): **92.2%** - Statistical p-value: **0.0007** (✓ significant)

#7 USDZAR_otc — PUT (SELL) (92.0% Martingale)

Type: `TimeWindow` **Conditions:** At 04:00 UTC, when: Close above Bollinger Upper Band **Performance:** - Signals in 30 days: **75** - Level 1 win rate (no martingale): **60.0%** - Martingale win rate (with 1 retry): **92.0%** - Statistical p-value: **0.0003** (✓ significant)

#8 BRLUSD_otc — CALL (BUY) (91.9% Martingale)

Type: `Triple+LondonKZ` **Conditions:** Hammer candle (long lower wick, small body) + Current candle is green + ATR below its 50-bar average (low volatility) **Performance:** - Signals in 30 days: **37** - Level 1 win rate (no martingale): **73.0%** - Martingale win rate (with 1 retry): **91.9%** - Statistical p-value: **0.0088** (✓ significant)

#9 USDZAR_otc — PUT (SELL) (91.9% Martingale)

Type: `TimeWindow` **Conditions:** At 13:00 UTC, when: Liquidity sweep **Performance:** - Signals in 30 days: **37** - Level 1 win rate (no martingale): **54.1%** - Martingale win rate (with 1 retry): **91.9%** - Statistical p-value: **0.0088** (✓ significant)

#10 USDEGP_otc — CALL (BUY) (91.3% Martingale)

Type: `TimeWindow` **Conditions:** At 14:00 UTC, when: Close below Bollinger Lower Band
Performance: - Signals in 30 days: **69** - Level 1 win rate (no martingale): **63.8%** - Martingale win rate (with 1 retry): **91.3%** - Statistical p-value: **0.0009** (✓ significant)

#11 USDZAR_otc — CALL (BUY) (91.2% Martingale)

Type: `TimeWindow` **Conditions:** At 20:00 UTC, when: Hammer candle **Performance:** - Signals in 30 days: **57** - Level 1 win rate (no martingale): **61.4%** - Martingale win rate (with 1 retry): **91.2%** - Statistical p-value: **0.0023** (✓ significant)

#12 USDIDR_otc — CALL (BUY) (91.2% Martingale)

Type: `Triple+LondonKZ` **Conditions:** Three consecutive red candles before this bar + Two consecutive dojis before this bar + ATR below its 50-bar average (low volatility) **Performance:** - Signals in 30 days: **34** - Level 1 win rate (no martingale): **61.8%** - Martingale win rate (with 1 retry): **91.2%** - Statistical p-value: **0.0147** (~ marginal)

#13 USDINR_otc — PUT (SELL) (91.2% Martingale)

Type: `Triple+LondonKZ` **Conditions:** RSI(14) between 60-75 + Close above Bollinger Upper Band + Doji (body < 30% of range) **Performance:** - Signals in 30 days: **34** - Level 1 win rate (no martingale): **61.8%** - Martingale win rate (with 1 retry): **91.2%** - Statistical p-value: **0.0147** (~ marginal)

#14 USDIDR_otc — CALL (BUY) (90.9% Martingale)

Type: `TripleCombo` **Conditions:** Current candle is green + Liquidity sweep (wick below recent low, close back inside) + Two consecutive dojis before this bar **Performance:** - Signals in 30 days: **33** - Level 1 win rate (no martingale): **69.7%** - Martingale win rate (with 1 retry): **90.9%** - Statistical p-value: **0.0174** (~ marginal)

#15 USDINR_otc — PUT (SELL) (90.9% Martingale)

Type: `Triple+LondonKZ` **Conditions:** Close above Bollinger Upper Band + Two consecutive green candles before this bar + Doji (body < 30% of range) **Performance:** - Signals in 30 days: **33** - Level 1 win rate (no martingale): **57.6%** - Martingale win rate (with 1 retry): **90.9%** - Statistical p-value: **0.0174** (~ marginal)

#16 USDIDR_otc — CALL (BUY) (90.7% Martingale)

Type: `Triple+LondonKZ` **Conditions:** Close below Bollinger Lower Band + Lower wick longer than upper wick + ATR below its 50-bar average (low volatility) **Performance:** - Signals in 30 days: **54** - Level 1 win rate (no martingale): **70.4%** - Martingale win rate (with 1 retry): **90.7%** - Statistical p-value: **0.0038** (✓ significant)

#17 USDBDT_otc — CALL (BUY) (90.6% Martingale)

Type: `Triple+LondonKZ` **Conditions:** Close above EMA(50) + Two consecutive red candles before this bar + Two consecutive dojis before this bar **Performance:** - Signals in 30 days: **32** - Level 1 win rate (no martingale): **56.2%** - Martingale win rate (with 1 retry): **90.6%** - Statistical p-value: **0.0206** (~ marginal)

#18 USDPHP_otc — PUT (SELL) (90.6% Martingale)

Type: `TripleCombo` **Conditions:** Shooting star (long upper wick, small body) + Fair Value Gap (bearish 3-candle imbalance) + ATR below its 50-bar average (low volatility) **Performance:** - Signals in 30 days: **32** - Level 1 win rate (no martingale): **62.5%** - Martingale win rate (with 1 retry): **90.6%** - Statistical p-value: **0.0206** (~ marginal)

#19 BRLUSD_otc — CALL (BUY) (90.4% Martingale)

Type: `TimeWindow` **Conditions:** At 17:00 UTC, when: Close below Bollinger Lower Band **Performance:** - Signals in 30 days: **94** - Level 1 win rate (no martingale): **67.0%** - Martingale win rate (with 1 retry): **90.4%** - Statistical p-value: **0.0003** (✓ significant)

#20 USDDZD_otc — PUT (SELL) (90.4% Martingale)

Type: `TimeWindow` **Conditions:** At 13:00 UTC, when: Liquidity sweep **Performance:** - Signals in 30 days: **52** - Level 1 win rate (no martingale): **63.5%** - Martingale win rate (with 1 retry): **90.4%** - Statistical p-value: **0.0052** (✓ significant)

#21 USDZAR_otc — PUT (SELL) (90.3% Martingale)

Type: `Triple+LondonKZ` **Conditions:** Fair Value Gap (bearish 3-candle imbalance) + MACD histogram crossed from positive to negative + ATR below its 50-bar average (low volatility) **Performance:** - Signals in 30 days: **31** - Level 1 win rate (no martingale): **54.8%** - Martingale win rate (with 1 retry): **90.3%** - Statistical p-value: **0.0244** (~ marginal)

#22 USDPHP_otc — CALL (BUY) (90.2% Martingale)

Type: `TripleCombo` **Conditions:** Big green body (>2× average body) + Liquidity sweep (wick below recent low, close back inside) + Three consecutive red candles before this bar **Performance:** - Signals in 30 days: **41** - Level 1 win rate (no martingale): **56.1%** - Martingale win rate (with 1 retry): **90.2%** - Statistical p-value: **0.0121** (~ marginal)

#23 USDDZD_otc — CALL (BUY) (90.0% Martingale)

Type: `TimeWindow` **Conditions:** At 08:00 UTC, when: Liquidity sweep **Performance:** - Signals in 30 days: **50** - Level 1 win rate (no martingale): **54.0%** - Martingale win rate (with 1 retry): **90.0%** - Statistical p-value: **0.0072** (✓ significant)

#24 USDZAR_otc — PUT (SELL) (90.0% Martingale)

Type: `Triple+LondonKZ` **Conditions:** RSI(14) > 70 (overbought) + Close above Bollinger Upper Band + ATR below its 50-bar average (low volatility) **Performance:** - Signals in 30 days: **40** - Level 1 win rate (no martingale): **57.5%** - Martingale win rate (with 1 retry): **90.0%** - Statistical p-value: **0.0142** (~ marginal)

#25 USDPHP_otc — CALL (BUY) (90.0% Martingale)

Type: `TripleCombo` **Conditions:** Fair Value Gap (bullish 3-candle imbalance) + Two consecutive dojis before this bar + ATR below its 50-bar average (low volatility) **Performance:** - Signals in 30 days: **30** - Level 1 win rate (no martingale): **63.3%** - Martingale win rate (with 1 retry): **90.0%** - Statistical p-value: **0.0289** (~ marginal)

Recommended Daily Routine

1. **Pick 2-3 exploits** from the top 10 above for your trading session.
2. **Match the asset + time window:** only enter when the conditions match.
3. **Stick to the rule:** if Level 1 loses, martingale ONCE then stop.
4. **Risk per trade:** 1-2% of account. After martingale, the next trade should be at 1% (do NOT compound martingale sizes).
5. **Avoid the same exploit repeatedly:** even 90% win rate means 1 in 10 losses. Wait at least 5-10 minutes between trades on the same asset.

Best Hours to Trade (UTC)

Most top exploits cluster around these UTC hours: - **04:00 UTC** — early Asian volatility (USDINR bb_lower, USDZAR bb_upper) - **08:00 UTC** — London open (USDDZD sweep) - **12:00-14:00 UTC** — New York open (USDPKR bb_upper, USDCOP bb_upper, USDEGP bb_lower) - **18:00 UTC** — Asia crossover (BRLUSD star) - **20:00 UTC** — late NY (USDZAR hammer)

Risk Warning

These exploits are based on **30 days** of historical data. Markets change. Past performance does NOT guarantee future results. Always: - Start with **demo account** for at least 1 week - Track every trade in a journal - Stop trading after 3 consecutive losses - Re-validate exploits every 2 weeks with new data
